Egypt, Cairo, New Cairo https://www.linkedin.com/in/ahmed-tawfik-041378246/

Profile

Telecommunication Engineer with hands-on experience in mobile core network operations within a Huawei environment (Zain KSA project). Skilled in monitoring, troubleshooting, and supporting EPC and IMS nodes, with practical exposure to 4G/5G core technologies. Strong foundation in IP networking (CCNA-level) and telecom protocols, with growing expertise in mobility management, session management, and packet core signaling.

Education

June 2024

Bachelor of Engineering, Electronics and Communications Department
Dual degree, Egyptian Russian University & Izhevsk State Technical University

Graduation Project: Flutter mobile application based on IOE smart city integrated with 5G network.

Experience

FO Core PS/CS/IMS Engineer – Huawei (Zain KSA Project)
Dec 2025 – Present

- Monitor and manage core network alarms using U2020 across PS Core and IMS domains (MME, SGW, PGW, HSS, PCRF, UDM, AMF, SMF, UPF, PCF).
- Perform alarm correlation and initial troubleshooting to proactively detect and prevent service degradation or outages.
- Handle Critical/Major incidents through OWS ticketing system, ensuring SLA compliance and proper escalation to L2/Back Office teams.
- Support planned and emergency operations (software upgrades, node restarts, rehoming activities) following change management procedures (RCs).
- Execute provisioning and configuration requests on core nodes (HSS/HLR/UDM/PCRF) in coordination with concerned teams.
- Investigate and resolve roaming-related issues with international partners to maintain service continuity.
- Perform end-to-end ticket tracking (E2E TT) and ensure proper closure of customer complaints and network alarms.

- Collaborate with cross-functional teams (Field, Transmission, IP, L2) for efficient fault isolation and service restoration.

Training & Technical Knowledge

• **Networking (CCNA-level knowledge)**
IP addressing, subnetting, routing & switching basics, network troubleshooting, and enterprise/telecom network fundamentals.

• **Microsoft Windows Server (MCSA-level knowledge)**
Basic system administration, networking services, and enterprise infrastructure concepts.

• **Mobile Communication Systems**
LTE/4G fundamentals, RF basics, drive test concepts, KPI interpretation, and mobile network architecture understanding.

• **Cyber Security Fundamentals**
Basic network security principles, threats, vulnerabilities, cryptography basics, and access control concepts.

Projects

- **IoE Smart City 4G/5G Network Planning & Optimization (Graduation Project)**

- Designed and optimized smart-city communication using 4G/5G technologies.
- Built parts of a Flutter mobile application for network visualization and efficiency analytics.
- Led the project team, managed tasks, and delivered an excellent-graded final system.

- **Mobile Communication Package Configuration Project (Training at Trust Company)**

- Worked on configuring mobile packages, understanding network parameters, and analyzing RF behavior.
- Participated in hands-on tasks related to mobile communication systems.

Personal

- Military Status: COMPLETED
- Nationality: EGYPTIAN
- Date of Birth: 12-Jan-2002
