Introduction & Explanation

OBJECTIVES:

- Show you how to ultra dispatch and become Goose approved.
- In case you don’t know a specific code or instructions on how to deal with certain situations.
- I will try to cover as much as I can.

1. Introduction to Dispatch :

Welcome to the dispatch gang, it's kind of like 911 but for towing service, we try to service members as soon as possible, and try our best to make everything run smoothly.

Definition of Dispatch and what to expect :

Incoming calls from stranded members, drivers asking a lot of questions, GPS tracking and responding to members (AND drivers), safety protocols and of-course the legendary ... Angry or distressed members.

Anyway..

Don't worry—we're not throwing you in unprepared. This manual will walk you through every beep, ping, and priority call you'll face. With practice and a little "goose grit," you'll be assigning trucks like a seasoned pro💯.

2. Communication 101 **VERY IMPORTANT** (Understanding Customer Needs)

Active Listening
To be able to handle any call, tow or battery or whichever service, you need to understand the member's complaint, analyse it and assign it to a driver. If you don't understand what's wrong, a lot of miscommunication happens.
Empathy and Understanding
Put yourself in the member's shoes to understand their emotions and concerns better. Try to empathize with their situation and show genuine concern for resolving their issues; don't make it sound too fake. The easiest way is to adjust your tone to match the customer's emotions.

Identifying Customer expectations and asking questions
Ask relevant questions to determine the customer's expectations and requirements.
Understanding their expectations helps in delivering accurate solutions.
All they'll need is to keep them informed and updated.

4. Handling Difficult Members

Dealing with Complaints
Listen attentively to the customer's complaint, apologize for any inconvenience caused, and assure them that you will help them as much as you can. They'll probably start calming down after or blame someone else. (hopefully themselves for once)

Managing Angry Members
Stay calm and composed, even if the customer is angry or frustrated. Avoid taking their comments personally and focus on finding a resolution. They don't know you bro, don't worry. They're stuck in traffic on a hot day, and their car is messed up, you know, put yourself in their shoes.

- **Tips and tricks for handling members:**

Just keep in mind they just want help, so most of the members will be nice and understanding
1 - Let them know you'll keep them updated (This makes things much easier)
2 - Asking them all the questions you'll need and making sure they know you're listening to them
3 - Just sound nice and confident, confidence goes a long way
4 - **AVOID FALSE PROMISES GANG.**
(False promise = bad survey = angry management = bad ending 👎)
(For example: Members sometimes ask to lower the price of the overmileage, we're not charity work, this ain't TikTok. But you can say that nicely!)
"Wish I could do that for you, but it's company policy" is usually a response I use while sounding a little empathetic.
5 - ALWAYS confirm their location. You may be asking why, "AAA does that".
Yeah buddy, I wish, it's an automated system, so it usually doesn't hear what members are complaining about and is not as accurate, it's a win-win, you don't have to deal with drivers screaming in your ear about a wrong location, member feels like you know what you're doing 👍.

See? Easy right?

5. Building Rapport with Customers

Creating a Positive Emotional Connection
Use positive language and be friendly to make customers feel valued and appreciated.

Fostering Trust and Loyalty
Consistently deliver on promises (hence why we don't give false promises) and provide reliable service to build trust and foster long-term customer loyalty. Trust me, they WILL remember the company name.

Ok, enough Goosing around, let's get technical.

- **AAA Memberships:**

  Classic (Covered for 7 Miles AND pays for Fuel service) (12$ per mile) (6$ per gallon)

  Plus (Covered for 100 Miles)

  Premier (Covered for 200 Miles)
  (Also, there's an RV for each membership, which basically means the member has a vehicle that isn't a car, and he's covered for it (Motorhome, motorcycle, etc.)

Two types of services:

- Towing service (T6)

- **Flatbed**
  - It's usually for AWD vehicles
- **Wheel Lift**
  - Regular tow with the lift

- Light Service (BSP)

- **Battery** (T3)
- **Lockout** (T7)
- **Fuel Delivery** (T5)
- **Tire services** (T1)

Towing and its workflow :-

Erm... Wheel lift or Flatbed? ☝️🤓

Here's how to decide, it's not hard, but u gotta understand it.

Vehicles work with 3 systems: 4x4, AWD ,or 2WD)

Brief explanation:

- 4x4 cars sometimes can switch between 2WD and AWD. (It means usually AWD)
- AWD means all 4 tires move at the same time.
- 2WD 2 tires will be moving either the Front or the Rear.

- If it's 2WD and not very heavy, it can go on the wheel lift UNLESS they got a flat tire on the OPPOSITE SIDE of the system, so for example, if it's FWD and a flat tire on the REAR, it won't work and vice versa. **Sounds complicated? Don't worry, we got you**💯

- This is a website to help you know the cars' systems https://towspec.com/ (or literally google AI, works like a charm.)

- If it's AWD or 4x4, or a low vehicle, a flatbed is the way to go. Mostly it's expensive/sport cars that go on flatbeds, but sometimes, as mentioned above, you can get a 2005 Hyundai Elantra, but you gotta take it on a FB because it has a flat tire in the rear.

Important notes:

- There are some exceptions, if it's an AWD vehicle stuck in a parking structure... Welp, you're goosed. They need something called dollies (which are skates that are placed underneath the tire) (ALWAYS SEND A WL FOR PARKING STRUCTURES)

  Why?
  I won't judge you for that question.. But it's because it would break the drivetrain system (transmission). If it's supposed to be moving on ALL fours (AWD), then ALL four tires need to be either moving or NOT on the ground.

- If it doesn't go to N, you're also goosed.. **BUT** keep in mind, usually most vehicles have a Manual Neutral Override, so just Google search if it's possible, or ChatGPT will help you out.

- **Pro tip**: If it's a 2WD vehicle AND doesn't go to N (maybe like a hybrid vehicle if i remember correctly Chevy Volt or Bolt, **It can go on a WL, why?**

  Well, when you think about it, if you're gonna lift the transmission anyway, why worry about it 😎?

BSP and its workflow:

- Calls drop with 1 column, either (T3, T1, T5, T7) (T - codes)

T3 are battery calls, very important to not clear it with the wrong resolution code
Technicians either replace the battery, test it and jumpstart (if it's good or bad).
These all have targets each month so they're important to keep them on BSP drivers.

- **Each battery has an OPD** (Original date of purchase). We get those from AAA data in the service appointment, if you don't find any dates, we call them for it (most drivers do it on their own, some ask you to do it so just in case that happens, you will know what to do 👍).
- **Tire changes** are either changing spares or adding air to the tire. **WE DO NOT FIX TIRES OR PATCH TIRES ONLY REPLACE**. (If a member has no spare, they're getting towed, yes it's that serious). Something to look out for also is the wheel lock, if they aren't able to unlock it, its GGs, tow time.
- **As for fuel delivery**, technicians have a gas can that carries 5 gallons of fuel, each member takes 2 gallons, but classic members have to pay 6$ per gallon, any other membership is covered.
- Lockout services are for members who locked themselves out of the car; we have equipment to open the car, **not create a key. (That's something called Locksmith services, it's with AAA but not with towing companies.)**

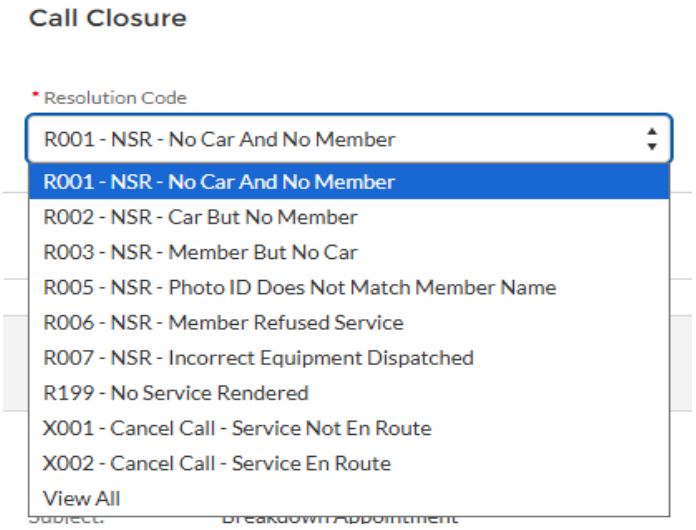

- Always put the info for batteries sold in the Excel sheet or for fuel delivery if they're a classic member.

COD Calls:

Calls that are paid for and not covered by AAA, they show up as a "$" call, it either means member has paid for the service or will pay, so call AAA and check it up with them to make sure 👍

Cancellations and declining calls: (Always ask a supervisor/manager before cancellation or declining calls, this is very important to not mess up so don't feel pressured to NOT ask. I'd rather be annoyed than get yelled at lol).

- This is what the cancellation options are: -

1. When the member calls and asks you to cancel or if you call them.
2. If service isn't covered (Convenience tow, asking for RV service when they don't have RV membership, Commercial vehicles, etc.).
3. If you're going to make an A call for a different service
4. If the member won't be present at neither pick up nor drop off.
5. If a member isn't answering and the driver is on location and has been for 10 mins.

(On how to cancel check Workflow cancellation section)

Declining calls:

Basically it means that we CANNOT do the service but **IT IS** covered by **AAA** just another provider not us. Which also means:

- Calls that are out of our primary area (you find that out when confirming member's info).
- Equipment unavailable (Locksmith services, Heavy-duty/Medium-duty services)

PS: It's always best not to decline calls, but sometimes there's no other choice. So try to keep it a last option resolution.

Commercial vehicles and RV:

- Commercial vehicles are basically vans or cars that are for commercial use or works for a company
- Commercial calls usually get **cance**lled, but it's always best to call AAA to confirm policy,
    - Tell the driver to go 97 and take a picture of the vehicle, post it on the feed
    - Call AAA and advise them with the situation to make sure of cancellation
        - **Pro tip: You can ask the member to send you a picture of the vehicle.**

RV Memberships:

- Motorcycles CANNOT be towed unless the member has the letters "RV" in their membership

For Ex:- **Member Benefit Level:** Plus RV
Phone Number: (404) 353-6937

- RV is a type of service that covers heavy vehicles, motor homes, motorcycles etc
- Usually it's a truck carrying like a metal box or like a small motor home

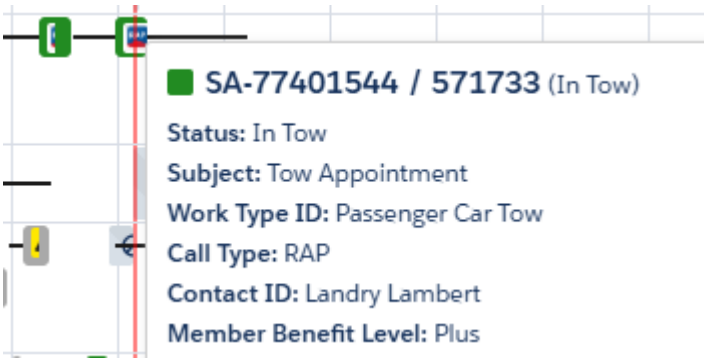

This can't be towed without RV membership and most of the times would need Heavy Duty or Medium duty.

What if the member orders an RV service when they don't have RV, it will be considered as COD. (Cash on delivery, not covered by AAA).

- **Sometimes members have RV in their membership but it's showing they don't, that's an error so make sure to always call AAA to confirm they're not RV.**
    - **Pro tip: You can ask the member to send you a picture of the vehicle. (so you can decide what to do).**

RAP Calls:

Number 1 rule: DO NOT CANCEL RAP CALLS.
Anything regarding RAP calls, you usually call AAA to edit it. That includes drop off change, service change, cancellation, anything changing.

Why?

Because RAP calls are done through an agency, but the service is provided through AAA, it's another provider whoever it is, can be Honda, Chevrolet etc. , basically, it's a 3rd party.

Workflow

Workflow :

1. Call drops in AAA spotted calls.
2. Call assigned to the driver. (If it doesn't just move it).
3. Highlight the column and press S on each column of the call and click the KMI checkbox. (or double click the box and click the top right arrow on each box).
   Also you have 5 minutes to do that hence why I said do it as step 3.
4. Call members to inform ETA and get information.
5. Reassure the member they will get the help they need (again.. NO FALSE promises).
6. Let the driver know what to expect through text.
7. Keep watching the status.
8. Repeat.

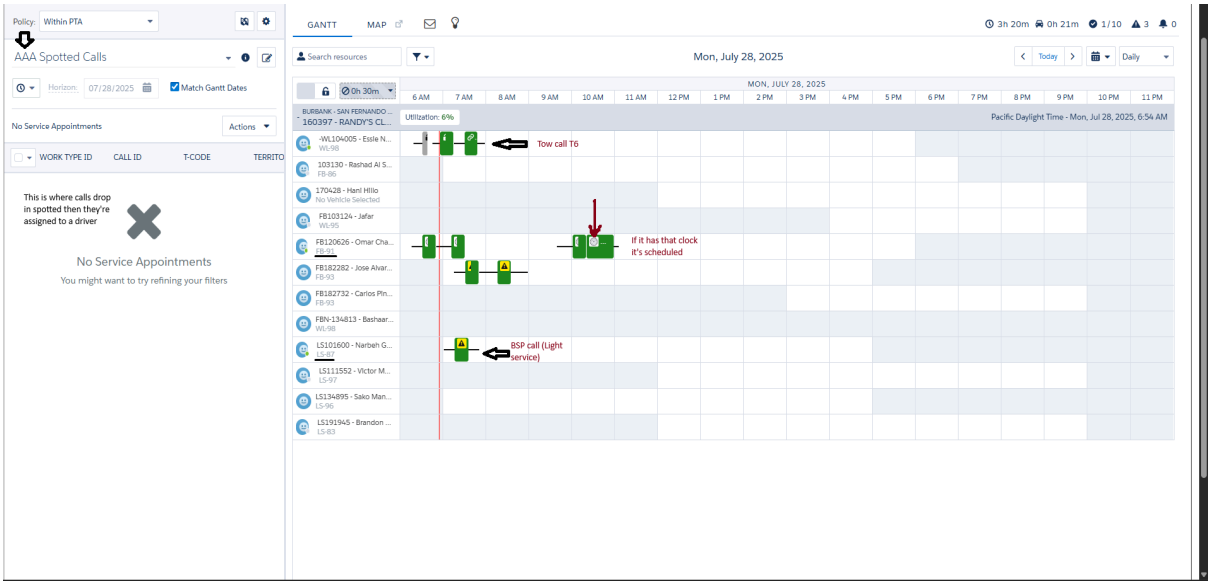

- What do you need to do?
  Take the call, assign to driver (or it drops automatically)

  preferably the closest one

  - *PS AAA dispatches calls on the closest driver (if no driver is close it will be random)*

    - Call the member get the info you need

      (Ask them the questions on your desk) then, text the driver the info

Representation of FSL

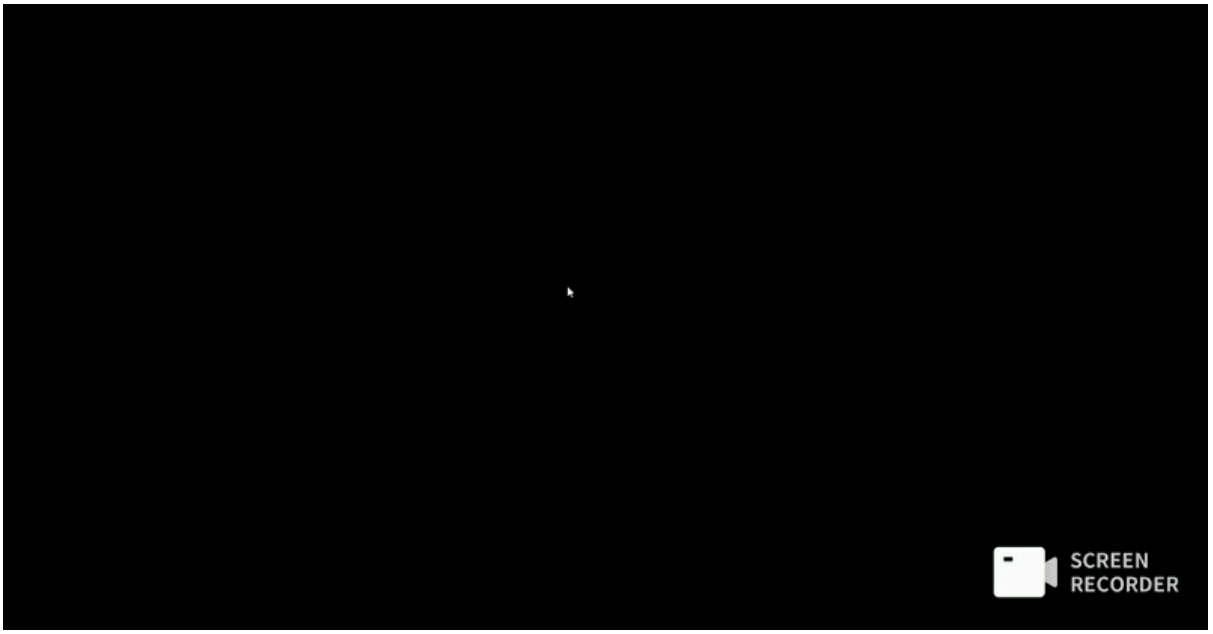

- Spotted calls where calls drop.
- What calls look like.
- BSP and tow (as you can see, T6 calls have 2 columns, LS has 1 column.)

How the calls drop :

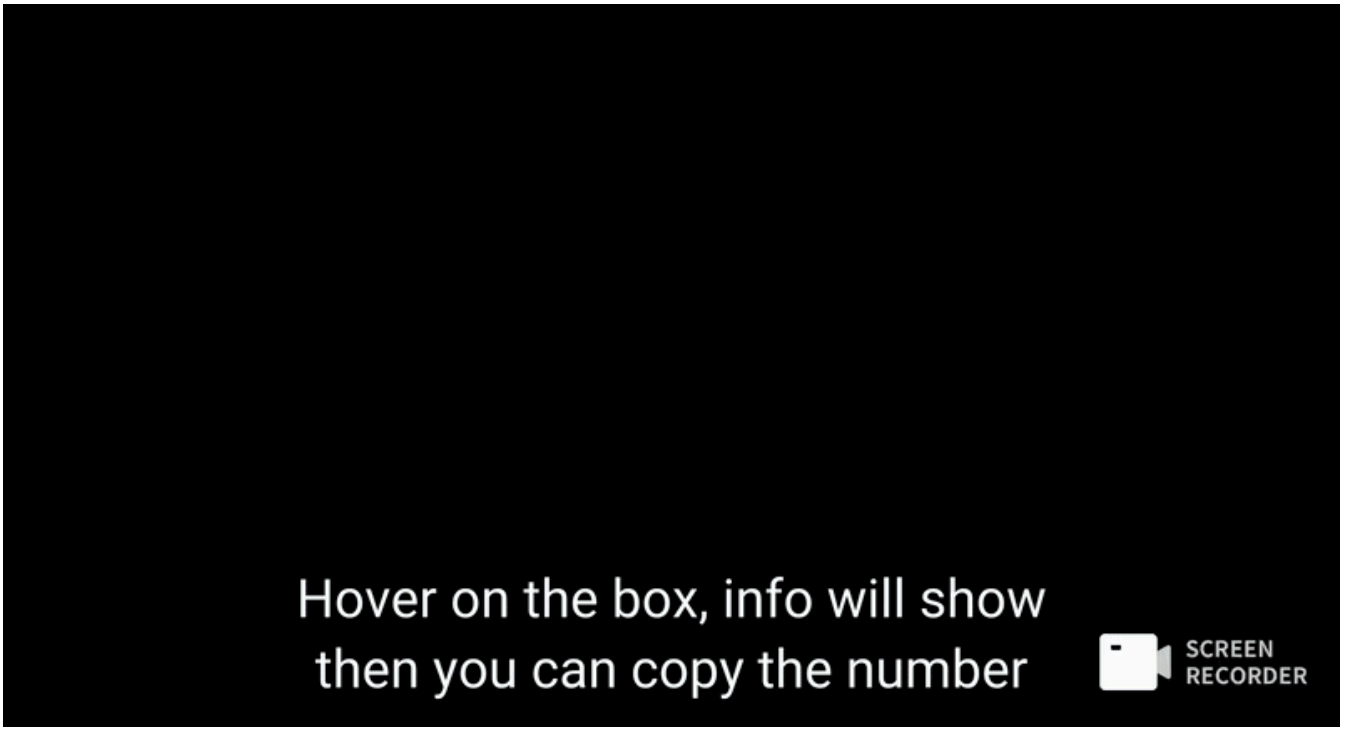

(do KMI for both boxes if it's a T6 as shown in the video above)

Pro tip: To do KMI for the first box or BSP calls you can do this ->

(I pressed space after clicking edit, if you're wondering how without hovering on it).

How to call a member :

Write that info down while on a call with the member :

Assigning to driver :

Priorities.

- Hot call
- KMI (Keep member informed)
- PTA (Promised time of arrival)
    - Hot call is a high priority call it looks like this

Usually it's a car blocking traffic or an accident or maybe on the freeway, hence why it's top priority it's someone in danger.

- Sometimes it says "Public Agency" which means the CHP/Police called it in and usually it's for accidents and collisions.
- **Question to ask :**
    - Are you in a safe location? (they have to be on the right side of the freeway, if not we call CHP)
    - Confirm the location ESPECIALLY if it's a freeway because most of the time it's not accurate (Ask which exit is the closest before or after them and which side they're going "North, South, West or East")
    - What happened to the car? (usually it's a tire due to pothole on the freeway or it died while driving.)

Claims tow :

It's a tow for a car that was involved in a collision or is being held up at a tow yard by insurance or whichever maybe they're paying. It's like keeping it in storage.

- First claims tow: they never pay fees.
- Second claims tow: Depends, so you have to call **AAA** and ask.

PS: not much to be said but if you want to know, they're usually cars that are in tow yards due to accidents, they're stored at a certain place or going from place to place under a certain insurance.

Cancellation: (VERY IMPORTANT)

Cancelling calls depends on each station, so always ask if you're not sure, don't worry we've all been there.

Wrong cancellations 99% of the time will bite back, so, always focus on that part.

730/135/178 - CRS Roadside Srv Cancellation / NSR (CRS, West and North)

Put driver en route, on location first, wait 3 mins then NSR,

002 - Car but no member	**T1 or T7**
003 - Member but no car	**ANY T3 (Put driver en route, on location first, wait 3 mins then cancel)**
006 - Member Refused Service	**Tow cancellation**
005 - Photo ID Doesn't Match Member Name	**ONLY IF PHOTO-ID DOESN'T MATCH THE MEMBER'S NAME. NEVER ANY OTHER CASE**

118 - Missouri Roadside Srv Cancellation / NSR

- Put driver en route, on location first, wait 3 mins then NSR

002 - Car but no member	T1 or T7
003 - Member but no car	ANY T3 (put driver en route, on location first, wait 3 mins then cancel)
006 - Member Refused Service	Tow cancellation
005 - Photo ID Doesn't Match Member Name	ONLY IF PHOTO-ID DOESN'T MATCH THE MEMBER'S NAME. NEVER ANY OTHER CASE

153/183 - Texas Roadside Srv Cancellation/ NSR

- Put driver en route, on location first, wait 3 mins then NSR

002 - Car but no member	T1 or T7
003 - Member but no car	ANY T3 (put driver en route, on location first, wait 3 mins then cancel)
006 - Member Refused Service	Tow cancellation
005 - Photo ID Doesn't Match Member Name	ONLY IF PHOTO-ID DOESN'T MATCH THE MEMBER'S NAME. NEVER ANY OTHER CASE

397 - Randy's Club Srv Cancellation

- Put driver en route, on location first, wait 3 mins then NSR

003 - Member but no car	For any service NSR it 003, you can ask management, also to make sure.

Important Note:

Any NSR that is done, we need to document before doing it.

Reason why it's cancelled and a picture would be very good (you can ask the driver to get a license plate from the parking lot or any car on the street, or even write the license plate itself doesn't have to be a picture).

We try our best to avoid cancellations, we always NSR calls,

NSR: We get paid half or full pay, depending on the cancellation

Cancel: We don't get paid at all, (AKA resolution codes X001 and X002, never use them).

Codes and Abbreviations

“10 -” Codes

10-4 ➡️ **Copy**

10-7 ➡️ **Station closed**

10-19 ➡️ **Going home**

94 (or 95) ➡️ **On location, didn’t find member yet**

97 ➡️ **On location with member**

98 ➡️ **Call cleared**

“T ” Codes

- **A - Alpha**
- **B - Bravo**
- **C - Charlie**
- **D - Delta**
- **E - Echo**
- **F - Fox**
- **G- Golf**
- **H - Hotel**
- **I - India**
- **J - Juliet**
- **K - Kilo**
- **L - Lima**
- **M - Mario**
- **N - November**
- **O - Oscar**
- **P - Papa**
- **Q - Quebec**
- **R - Romeo**
- **S - Sierra**
- **X - X-ray**
- **Z - Zulu**

Tire Change:

T1A - G101, Flat tire, spare change.

T1B - G102, Flat tire, air-only.

Battery:

T3A - Battery Jump Req

T3B - Battery Install Req

T3E - Failed Test, No install

T3D - G306, Battery Replacement (Sale)
T3F - G302, Passed test, No install
T3G - No test done (hopefully never!)

T3H - G308, Warranty

T3India - G307, Pro-rated Warranty

T4 - Need assistance

T5A - G401, Fuel delivery - Gas

T5B - G402, Fuel Delivery - Diesel

Tow:

T6A - Tow

T6C - Collision tow (Claims) Under Membership

T6D - Collision tow (Claims) Under Insurance

T7A - G701, Locked out of Vehicle

T7B - Lockout (keys in trunk w/manual release)

T8, Extrication / Winch out stuck vehicle

Tips & Tricks

This page will be for Tips and Tricks

PS: It's from top employees
